

NEW FROM WHURR PUBLISHERS

INTRACRANIAL AND INNER EAR PHYSIOLOGY AND PATHOPHYSIOLOGY

Edited by
Andrew Reid,

Royal United Hospital NHS
Trust, Bath, UK

Robert
Marchbanks,

Southampton University
Hospital, Southampton, UK

Arne Ernst,

Unfallkrankenhaus, Berlin,
Germany

Foreword by

Professor J.D. Pickard,
Cambridge, UK and
Professor A.R. Møller,
Dallas, USA

- An innovative scholarly text that presents over thirty contributions from the leading international experts in the field.
- Combines the clinical and research aspects of fluid and pressure regulation in the intracranial and intralabyrinthine compartments.
- Drawn from papers presented at the Second International Conference on Intracranial and Inner Ear Fluids: Basic Aspects and Clinical Applications, held in Bath, UK in 1997 under the auspices of the British Society of Audiology.

1998 £50.00
ISBN 1 86156 066 4
328 pages 234 x 153mm
hardback

CONTENTS

PART 1

INTRACRANIAL PHYSIOLOGY

1. The anatomy and physiology of intracranial fluids – *MB Segal*
2. Hydromechanics of the intracranial and labyrinthine fluids – experimental study in cats – *B Carlborg and KS Konrádsson*
3. Dynamics of inner ear pressure change caused by cerebrospinal fluid pressure manipulation in guinea pigs – *EO Thalen, HP Wit, JM Segenhout and FWJ Albers*
4. CSF and posture effects on transient evoked otoacoustic emissions – pilot study – *MA Ferguson, AC Davis and EA Lovell*

PART 2

INTRACRANIAL PATHOPHYSIOLOGY

5. Pathophysiology of the cerebrospinal and cerebrovascular circulations – *JD Pickard, S Piechnik, P Smielewski, PJ Kirkpatrick and M Czosnyka*
6. Intraoperative neurophysiologic monitoring in skull base operations – *AR Møller*
7. Neurotologic manifestations of intracranial hypertension – *A Sismanis*
8. Idiopathic normal pressure hydrocephalus: primary disorder of CSF absorption or parenchymal cerebral disease? The relevance of vascular risk factors and cerebral white matter lesions – *JK Krauss*
9. Influence on the auditory system of cerebrospinal fluid loss: clinical and experimental results – *A Walsted*
10. OAE and TMD recordings in ICP changes – *A Ernst, T Lenarz and K Weckbecker*
11. A review of the management and current methods of investigating intracranial pressure in shunted hydrocephalics and an introduction to tympanic membrane displacement test –

12. The application of the tympanic membrane displacement (TMD) test as part of the clinical service for hydrocephalus patients – *S Flynn, RJ Marchbanks and D Burge*
13. Quantitative assessment of intracranial pressure by the tympanic membrane displacement test in patients with shunted hydrocephalus – *M Samuel, DM Burge and RJ Marchbanks*

PART 3

INNER EAR PHYSIOLOGY

14. Physical processes underlying homeostasis of cochlear endolymph – *AN Salt and JE DeMott*
15. Cellular mechanisms of volume control in the labyrinth – *P Wangemann*
16. Non-invasive perilymphatic pressure measurements using the MMS-10 Tympanic Displacement Analyser in patients with Ménière's disease – *HJ Rosingh, HP Wit and FWJ Albers*
17. Modelling labyrinthine fluid dynamics – *JC Andrews, D Strelhoff, M Bergsneider and D Becker*
18. The effect of changes in cochlear fluid pressure on audiological measurements – *AJ Phillips, GB Farrell and ARD Thornton*
19. Ionic transports in the endolymphatic sac of the guinea pig – *V Couloigner, M Teixeira, P Hulm, O Sterkers, G Planelles and E Ferrary*
20. Beta-trace protein in human perilymph – *G Bachmann, SE Baldus, M Nekić and O Michell*
21. Characteristics of infrasonic otoacoustic emissions generated by the cardiovascular system – *MP Hughes and RJ Marchbanks*
22. Morphological effects of low extracellular calcium on stereociliary bundles in the guinea pig cochlea – *BN Kumar, DN Furness and CM Hackney*
23. Dynamics of inner-ear pressure release measured with a double-barrelled

micropipette in the guinea pig – *HP Wit, EO Thalen, JM Segenhout and FWJ Albers*

PART 4

INNER-EAR PATHOPHYSIOLOGY

24. Treatment of otolith disease: concepts and new development of laser microsurgery – *M Westhofen, U Mangold and W Wöllmer*
25. Posturographic correlates of peripheral and central vestibular disorders, as assessed by electronystagmography (ENG) and the Tetrax Interactive Balance System – *R Kohen-Raz, A Sokolov, A Kohen-Raz, M Demmer and M Har-El*
26. Vertigo and progressive sensori-neural hearing loss – peripheral cause or vascular compression of CN VIII? – *MB Møller*
27. Acetazolamide therapy of endolymphatic hydrops audiotically monitored by low-frequency masking: a case report – *EA Kabudwand, D Adler, G Scholz and D Mrowinski*
28. Effects of middle ear pressure changes on the inner ear function in Ménière's disease: a review – *B Densert, S Arlinger, O Densert, K Sass and L Ödkvist*
29. Tullio phenomenon: disturbed inner ear homeostasis? – *CF O'Mahoney and LM Luxon*
30. Traumatic sudden sensorineural hearing loss in children – *B Kou and R Macdonald*
31. Fleeting hearing loss: reversible dysfunction of the cochlea during acute bacterial meningitis – *MP Richardson, PT Rudd, A Reid and MJ Tarlow*
32. Recurrent perilymphatic fistula in patients with possible patent cochlear aqueduct: a role for cochlear aqueduct blockade – report of five cases – *DJ Weider and FE Musiek*
33. Effects of the atrial natriuretic peptide (ANP) on hearing and tinnitus in patients suffering from Ménière's disease – *J Lamprecht*

ORDER FORM

To: Whurr Publishers Ltd, 19B Compton Terrace, London N1 2UN, UK

Please supply _____ copy/ies of
 INTRACRANIAL AND INNER EAR
 PHYSIOLOGY AND
 PATHOPHYSIOLOGY @ £50 each

Postage and packing: within the UK – free;
 outside the UK – please add £2.

I enclose a cheque/money order made payable to Whurr Publishers for £ _____

Please bill me
 Please debit my AmEx/MasterCard/Visa*
 account for £ _____
 *please delete as appropriate

Card no. _____

Expiry date _____

Signature _____
